Jerry,

so it looks like we have a few non-EPA hits on the data file on Monday night before it was pulled down and corrected.

Rich

John,

Thanks for looking into this. The answer we wanted was that it was not accessed, but the correct one will do.

-John

John,

Mr. Campbell has provided as much information as possible about the Dimock file in question. I'm sure this is too much to pass along but I thought you should know that he put in some good effort for you (as if he ever puts in any less).

He's the man.

Greetings **Ex. 4 - CBI**

Sorry not to get back to you sooner... kept getting side tracked.

The file was accessed and likely viewed in Adobe Acrobat at 6:30 PM EDT and again at 6:39 PM EDT from IP address 69.193.34.43 (<http://whois.arin.net/rest/net/NET-69-193-0-0-1/pft>), which appears to belong to an Internet Service Provider (ISP) serving the Syracuse and/or New York City areas in New York.

The file was later accessed at 7:54 PM EDT and again at 8:18 PM EDT by an EPA IP address.

At 9:48 PM ET, it was accessed from IP address 96.245.230.142 (<http://whois.arin.net/rest/net/NET-96-224-0-0-1/pft>), which appears to belong to another ISP, Verizon Internet Services. We didn't see anything that provided more information.

Finally, at 11:09 PM ET, it was accessed from IP address 166.248.35.163 (<http://whois.arin.net/rest/net/NET-166-128-0-0-1/pft>), which appears to be a cell phone, AirCard, or something similar which may have been registered and/or physically near Doylestown, PA.

The file doesn't appear to be accessed from the EPAOSC website again until about 1:00 AM EDT.

Hope this helps!

Subject: OSC Website Question

John Gilbert called this morning and said he posted a document to the Dimock website last night with public status and it contained data that should not have been public.

(<http://www.epaossc.org/sites/7555/files/Week%201%20Report%2003%2026%2012.pdf>)

Someone noticed around 11pm - ish that the data was up there and changed the document to Exclusive. John G. Wants to know if we can see if that document was accessed or downloaded by anyone in the time frame that it was public. If we can't tie it to a specific file, can we see if any files were downloaded during that time?

I wasn't sure if there was some sort of flag in the back-end that tracked downloads or anything.

Thanks and let me know if you have any questions.
